Muhammad Zakee Qureshi

AI Engineer

Lahore, Pakistan • +92 314 8028029 • zakee8979@gmail.com • linkedin.com/in/muhammad-zakee-a6928b1bb • github.com/zakee001

SUMMARY

AI Engineer working at the intersection of Generative AI, intelligent automation, and applied machine learning. Builds end-to-end AI solutions that turn complex business problems into practical, scalable systems — from multi-agent workflows and intelligent document processing to computer vision applications — with a focus on moving AI from experimentation into production.

EXPERIENCE

Junior Consultant, Data Science
Nov 2023 – Present

Systems Limited — Lahore, Pakistan

- Designed a multi-agent, domain-driven contract analysis system on Google Cloud Vertex AI for structured extraction, legal reasoning, and automated clause evaluation.
- Built a Generative AI-powered Active Directory health check tool that parses logs via LLMs, detects anomalies, and automates remediation.
- Developed a fully on-device Android shelf-to-catalog recognition pipeline (ArUco, YOLO, MobileNetV3, SIFT) for angle- and shadow-robust retail auditing.
- Optimized a document processing pipeline on Azure Functions/Container Apps with serverless GPU, cutting response time from 7–8 min to ~10 sec (42x).
- Built an AI-powered insurance underwriting app with automated triage, risk analysis, and document reporting.
- Built a PDF retrieval system (React, Django, vector DB, LLMs) with RBAC for secure, permission-aware document search.
- Applied Logistic Regression, Decision Trees, Random Forest, and XGBoost to predict Fixed Voice churn and identify key drivers.
- Built a POC for AI-powered contract clause tracking across versions using PageIndex, Docling, and XML structural analysis with semantic similarity for accurate, traceable change detection.

Computer Vision Engineer
Jul 2023 – Aug 2023

OMNO AI — Lahore, Pakistan

- Built real-time hand tracking with YOLO-NAS and converted models to ONNX for deployment.
- Fine-tuned Llama-2 on a custom dataset; generated scene-specific images using Stable Diffusion.

Computer Vision Intern
Aug 2022 – Sep 2022

Adlytic AI — Lahore, Pakistan

- Worked on CNN-based EDA, image captioning, human activity recognition, and facial expression recognition; applied LSTM/RNN for time-series prediction tasks.

Data Analytics & Management Intern
Jul 2021 – Sep 2021

Systems Limited — Lahore, Pakistan

- Gained hands-on experience in data warehousing, SQL, and ETL (SSIS, Power BI); built a management system with live data tracking.

EDUCATION

BS, Computer Science — FAST National University, Islamabad
Sep 2019 – Jul 2023 | Lab Demonstrator (Operating Systems) & TA (Digital Logic Design, Applied Physics), Jan–Jul 2023

CERTIFICATIONS

Generative AI on GCP • Microsoft Certified: Azure Fundamentals • DevOps and AI on Google Cloud: AI-Powered CI/CD

TECHNICAL SKILLS

Languages	Python, React, R, SQL, C++, HTML/CSS, JavaScript, Prolog, PHP, Assembly
Tools & Platforms	GCP (Vertex AI), Azure, Docker, GitHub/Git, PyCharm, Jupyter, Dynamics 365, SSMS, SSIS, Power BI
